Employment History

Independent Front-End Developer / React Developer (Freelance)

Jul 2024 – Present | Ireland

- Build React.js / Next.js apps focused on SEO, performance, and scalability.
- Develop SSR/SSG websites improving load speed and search visibility.
- Apply code-splitting, lazy loading, and asset optimization to improve Lighthouse scores.
- Create reusable, scalable UI with TypeScript and modern React patterns.
- Delivered e-commerce, loyalty and service platforms with OAuth2 and API integrations.
- Also build React Native apps, applying shared architecture and performance practices.

Senior Software Engineer – React Native (Contract)

Ejada | Amman, Jordan | Apr 2024 – Jul 2024

A leading MENA-region IT services firm with 3,500+ employees, focused on banking, telecom, and government digital transformation.

- Integrated Samsung Pay SDK into a React Native digital wallet in a regulated banking environment.
- Delivered subscription payment integrations (Netflix, YouTube).
- Resolved critical production issues using Firebase Crashlytics and Android Logcat.
- Managed builds and releases via GitLab CI/CD in Agile sprints.

React Native Developer

ESKADENIA Software | Amman, Jordan | Jan 2022 – Apr 2024

A CMMI Level 5 certified software company with 300+ employees serving telecom, insurance, healthcare, and education across Asia, Europe, and Africa.

- Contributed to Orange Money app (1.5M+ users); reduced bundle size ~25%.
 - Refactored to TypeScript, improving maintainability.
 - Built wallet, transactions, POS features, and hardware connection like thermal printer.
 - Mentored 3 developers, improving code quality and pull requests turnaround by 30%.
 - Collaborated across React, Angular, and backend teams during high-pressure sprints.
-

React Native & Front-End Developer

Roya TV & Media Group | Amman, Jordan | Feb 2021 – Jan 2022

Jordan's #1 TV channel and digital media group with multiple platforms including Roya Kitchen, Kids, News, and Waves.

- Delivered features across mobile and React.js web (Roya Kids).
 - Built features and 2 interactive games for the Roya Kids mobile app.
 - Implemented in-app purchases, offline-first cart flows, and audio recording features.
 - Improved UI flows, engagement, and content delivery.
-

Junior Front-End Developer

Wavemaker (GroupM) | Amman, Jordan | Aug 2019 – Feb 2021

A global media agency under WPP Group with operations in 90+ countries; Amman branch part of MENACOM Network.

- Developed React.js SPAs for booking and banking platforms.
 - Developed fully responsive web pages & admin dashboards, interactive UIs.
 - Built animated UI experiences and rich media advertising creatives using CSS3 keyframes and jQuery.
-

Additional Experience

Logistics & Systems Operator (Weekend) – Manor Farm, Ireland | Apr 2025 – Present

- Operate barcode scanning and digital stock systems; ensure data accuracy and system reliability.
-

Education

B.Sc. in Computer Information Systems – Al Al-Bayt University, Jordan

Certifications

- Next.js & React – The Complete Guide – [Udemy Certificate](#)
-

Languages

Arabic (Native), English (Fluent)
